RESPOND

RECOVER

Preparedness

Every Apartment should be prepared with Fire prevention & Safety Plan that includes:

- ✓ Understand & Implement Compliance mandates
- ✓ Personal/ Resident Fire Safety
- ✓ Constitute Fire Sub committees/ Rapid Response Teams
- ✓ Design & Implement Comprehensive Fire Safety Plan

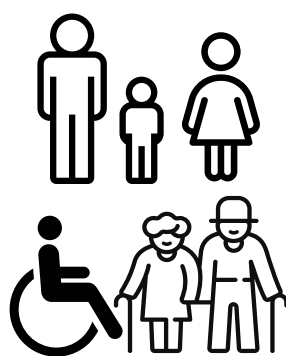

Note – While Association is responsible for compliance to existing Fire Acts & building preparedness on the whole – it cannot work without residents participating actively into this. This is a life skill that each citizen must know.

Emergency Action

There is need for properly laid down evacuation procedures, operating the fire systems, communicating & coordinating with residents & authorities alike for least damage. This can bring situation in control rapidly. This covers:

- ✓ Instructions for Citizens/ Residents (Adults/ Children/Sr Citizens/Special Needs persons etc)
- ✓ Instructions for Managers
- ✓ Activation steps in event of Fire
- ✓ Operative Equipments

Post Emergency Support

Rehabilitation is painful, however, as a community, we must get together to support those affected by the fire. And as time elapses – we must take a step back – understand what & why it happened – and feed it back to improve our preparedness & prevention plans. We must :

- ✓ Provide support to injured
- ✓ Follow up support/ Grieving member support etc
- ✓ Learn the lessons & feedback into the Preparedness & Plan
- ✓ Write to / Engage with - Beyond Carlton – to strengthen Fire Prevention & Preparedness & to see how we can engage further to prevent fires.

This simple guidance can be understood by all of us as citizens/residents or Managing committee members and will go a long way in mitigating fire risk.
